

## UPMC Horizon Community Health Foundation

### Healthy Habits for Life Peer-to-Peer Program

#### Guidelines

The UPMC Horizon Community Health Foundation is pleased to announce the ***Healthy Habits for Life Peer-to-Peer Program***. This initiative addresses critical health and wellness related needs in schools in Mercer County.

This UPMC Horizon Community Health Foundation project will engage our local high school students with elementary students developing leadership skills in the high school students and improving wellness and health in all ages. In addition, the program helps us to fulfill our mission: to fund programs that improve access to healthcare and promote healthy living in the UPMC Horizon service area.

Please note the following guidelines:

#### **AUGUST**

- The UPMC Horizon Wellness Center will designate a ***Healthy Habits for Life*** coach who will visit the school to meet with school staff and determine the needs of the students. Physical presence and oversight of the teacher will be necessary to ensure the program succeeds.

#### **SEPTEMBER – NOVEMBER**

- Middle School students participate in the ***Healthy Habits for Life Program***.
- At the beginning of the program, the coach will administer a written pre-test to test the Middle School student's knowledge related to exercise, nutrition and health and wellness attitude and will also calculate each student's BMI.
- The UPMC Horizon Wellness Center fitness coach, using the attached ***UPMC Children's Hospital Healthy Habits 4 Life*** outline will provide one 30 minute educational session during the week and guide one 30 minute physical activity during the week for nine weeks. Specific topics include:

- Healthy lifestyles/habits, smoking, nutrition
- Eating/exercise/obesity
- Decision making/role models
- Self Care/Self esteem/peer pressure
- Team building/playing well with others
- Diabetes, heart disease, other poor-health related diseases

#### **DECEMBER**

- The fitness coach will administer a post-test to all participating Middle School students and calculate BMI. Scores will be measured against the pre-test and pre-program BMI.
- The fitness coach and teacher together will determine up to 10 Middle School students who stand out as “wellness leaders” throughout the course of the 12-week class.

#### **JANUARY - FEBRUARY**

- The student “wellness leaders” will work with the coach to determine a healthy habits curriculum for elementary students throughout the spring.
- The wellness coach will teach the “wellness leaders” to administer an age related pre-test and calculate BMI’s on the incoming elementary students.

#### **MARCH - APRIL**

- The “wellness leaders” will implement the program on a peer-to-peer level, providing physical fitness ideas and leading physical activities with elementary schools students two times a week beginning in February of 2015 for a nine week period.
- The Wellness Center Fitness Coach and middle school teacher will provide oversight and guidance throughout the program.

#### **MAY**

- Post-tests will be administered to the middle school students who participated in the fall, the “wellness leaders” and the elementary students. This will help to gauge success of the program in changing habits.

- Outcomes assessment presented to the UPMC Horizon Community Health Foundation board.
- Awards recognition to participating students.

**For your school to be considered for this program, please complete the enclosed application and send to:**
